**ADB SYSTEMS WINS CUSTOMER CONTRACT IN RUSSIA
ADB's software to support maintenance and project management
activities of RC Consultants**

Stavanger, Norway – March 28, 2003 – ADB Systems International (TSX: ADY; OTCBB: ADBY), a global provider of asset lifecycle management solutions, announced today that its technology will be used by RC Consultants to support its engineering services for oil and gas companies in Russia.

“We have selected ADB’s technology based on its deep functionality and proven track record in the oil and gas sector,” said Liang Dong, Development Manager, RC Consultants. “Working with ADB will allow us to deliver improved value to our customers seeking to reduce operating costs and increase production efficiencies.”

A leading engineering services firm in the oil and gas industry, RC Consultants will use ADB’s software solutions to schedule maintenance and project management activities involved in the installation of a new drilling platform for Rosneft, one of Russia’s leading oil and gas exploration companies. Rosneft will begin drilling activities in the Caspian Sea in June, and will subsequently use ADB’s technology to schedule future maintenance activities.

“ADB’s experience in the oil and gas sector is enabling us to enter new markets as evidenced by today’s contract win,” said Jeff Lymburner, CEO of ADB Systems. “We look forward to working with RC Consultants and supporting their efforts at building a successful practice in Russia.”

About RC Consultants
